

# ABOUT RHINO'S

## INTRODUCTION

Do you know there are 5 types of Rhinos!  
They are called: White, Black, Javan, Indian and Sumatran Rhino.

## Habitat

There are many different places Rhinos can live, but the main place is the wild. Sadly though, they get hunted. That is why they also live in the zoo or reserve so they are safe and they are taken care of.

## Fact

Did you know that Rhino's have a favourite food?

## Diet

They are herbivores so they don't hunt. They eat various different things like grass but their favourite things are: bushes, leaves, and branches. In the winter if they are in captivity they are fed hay.

## **Life cycle**

Can you guess what a baby Rhino is called ...?

Rhinos that are male are called Bulls, females are called cows. Females give birth to one live young. Baby rhinos are called calves.

## **Identification**

Guess what Rhinos weigh...? Rhinos are mainly grey but they can come in different shades. Rhinos also have horns. They can reach speeds of 55km/hr. Rhinos can be 1.3m to 1.9m tall. Rhinos weigh 500kg to 2500kg!

## **Facts**

There are 29000 Rhino's left in the wild. Males mark their territory using their POO!
